

**Did you know** that school grounds designed *in cooperation* with nature can be better for people AND the planet!

# A CLIMATE READY SCHOOL GROUND IS...

## CLIMATE RESILIENT

Shade trees keep schools cooler on hot days, sponge-like surfaces reduce flooding after big storms, and plant diversity supports bees, butterflies and birds.

## HEALTHY

Daily access to nature increases physical activity and improves mental health

## EDUCATIONAL

Hands-on, multi-sensory learning in nature helps students experience climate solutions in action

## CHILD CENTRED

Children co-create the design with the wider school community

## WELCOMING

Designed to be a place for all people, plants, animals and pollinators
